PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building responsive web applications, REST APIs, AI-powered applications, and cloud-deployed systems. Strong experience with **React, Next.js, TypeScript, JavaScript, Node.js, Express.js, PostgreSQL, Docker, GitHub Actions, Terraform, Microsoft Azure, and AI APIs**. Experienced in translating product requirements into maintainable software, integrating third-party APIs, developing responsive interfaces, building backend services, and deploying production applications. Hands-on experience with **AI recommendations, embeddings, vector search, pgvector, OpenRouter, Groq, and Hugging Face**.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, shadcn/ui, Redux, Vite
Backend	Node.js, Express.js, Next.js API Routes, REST APIs, Repository Pattern
Databases	PostgreSQL, Prisma, Supabase, Neon, pgvector, CognoDB, Cypher
AI	OpenAI API, OpenRouter, Groq, Hugging Face, Embeddings, Vector Search, AI API Integration, RAG Concepts
Cloud & DevOps	Microsoft Azure, Docker, Docker Compose, GitHub Actions, CI/CD, Terraform, Azure VM, Azure Networking, Docker Hub, Vercel, Render
Infrastructure	Azure VNets, Network Security Groups, Azure Bastion, Nginx, Reverse Proxy, Infrastructure as Code
Tools	Git, GitHub, Postman, Figma

PROFESSIONAL EXPERIENCE

Frontend Developer | P2Vest

- Developed responsive and reusable frontend components for web applications.
- Integrated frontend applications with backend APIs and application services.
- Improved application usability, responsiveness, and performance.
- Collaborated with backend developers to implement product requirements and API-driven features.

Frontend Developer | Heirs Holdings

- Developed scalable and responsive web interfaces using modern frontend technologies.
- Built reusable components to improve UI consistency and development efficiency.
- Integrated frontend applications with backend services and APIs.
- Contributed to improving usability and responsive application experiences.

Web Developer | Deebaak IT World

- Designed, developed, and maintained responsive websites for clients.
- Built user-focused interfaces with emphasis on usability, performance, and mobile responsiveness.
- Implemented website features based on client requirements.
- Maintained and improved existing websites and web applications.

SELECTED PROJECTS

AI Movie Recommendation App React Express.js Supabase PostgreSQL pgvector Hugging Face Groq - Built a full-stack AI movie recommendation platform using semantic search and generative AI. - Implemented vector embeddings and pgvector similarity search to retrieve relevant movie candidates. - Integrated Groq for AI-powered recommendation generation based on user preferences. - Built a REST API with Express.js and a responsive React frontend. - Deployed the frontend and backend using Vercel and Render.	AI Expense Tracker System Next.js Azure Document Intelligence Neon DB - Built an AI-powered expense tracker that processes uploaded receipts. - Integrated Azure Document Intelligence to extract structured expense information from receipt images. - Implemented expense review workflows for approval and rejection. - Connected the application to a cloud-hosted PostgreSQL database using Neon.
AI Gift Assistant App JavaScript Node.js OpenRouter - Built an AI-powered gift recommendation application. - Integrated OpenRouter to generate personalized gift recommendations from user preferences. - Implemented a Node.js backend for AI API communication. - Designed an interactive frontend for collecting user requirements and displaying recommendations.	News Application Next.js TypeScript React PostgreSQL Prisma Docker - Built a full-stack news management application with CRUD functionality. - Implemented article creation, search, editing, deletion, and pagination. - Developed an API-driven architecture with database persistence. - Containerized the application using Docker.

Dog Marketplace — Dogs Nation React Next.js Tailwind CSS Vercel - Built a responsive marketplace for discovering dogs from sellers across Nigeria. - Developed listing interfaces for browsing available dogs and viewing detailed information. - Implemented responsive layouts optimized for desktop and mobile users. - Deployed the application to Vercel.	FormFlow — Dockerized SaaS CI/CD Architecture Docker Docker Compose Node.js Express.js PostgreSQL Prisma GitHub Actions Terraform Azure - Built a containerized three-tier SaaS architecture. - Configured Dockerized application services with PostgreSQL and Nginx. - Implemented GitHub Actions CI/CD pipelines and Docker Hub integration. - Provisioned Azure infrastructure using Terraform. - Configured reverse proxy and cloud networking components.
Routewell — Multi-Tier Azure VNet Microsoft Azure Terraform VNETs NSGs Azure Bastion - Designed a multi-tier Azure virtual network architecture. - Configured public and private networking for application infrastructure. - Implemented Network Security Groups and Azure Bastion. - Applied Infrastructure-as-Code principles using Terraform.	Reusable UI Login & Dashboard React Tailwind CSS - Built a responsive frontend UI containing login, dashboard, and settings pages. - Developed reusable components and responsive layouts. - Created a frontend-only demonstration without authentication.
Makeup & Gele Website React CSS Responsive Design - Built a responsive portfolio website showcasing makeup artistry and Gele styling services. - Created visually focused portfolio and service presentation sections. - Optimized the interface for desktop and mobile experiences.	

EDUCATION

Aptech Computer Education

Software Development / Computer Education

ADDITIONAL INFORMATION

Location	Lagos, Nigeria
Work Preference	Remote Software Engineering, Frontend Engineering, AI Engineering, and DevOps opportunities
