
ADEKUNLE JAMES

Frontend Engineer | DevOps Engineer | React • TypeScript • Cloud • CI/CD

Lagos, Nigeria • kunlele.kunzy@gmail.com • 09069903873 • github.com/jaysofly • linkedin.com/in/adekunle-abowaba

SUMMARY

Frontend Engineer and DevOps Engineer with experience building scalable, high-performance web applications and deploying containerized systems using modern cloud and DevOps practices. Specializes in React, Next.js, TypeScript, responsive UI systems, Docker, CI/CD, GitHub Actions, Terraform, Azure, Nginx, and REST API integration. Passionate about clean code, performance optimization, automation, reliable deployments, and delivering strong user experiences.

WORK EXPERIENCE

Frontend Developer – P2Vest (2022)

- Built responsive UI components, improved application performance, and collaborated with backend teams to integrate APIs.

Frontend Developer – Heirs Holdings (2018–2020)

- Developed scalable web interfaces and reusable components while enhancing UI consistency and usability.

Web Developer – Deebaak IT World (2013–2017)

- Built and maintained multiple client websites with a focus on responsiveness, usability, and performance.

SELECTED PROJECTS

FormFlow – Dockerized SaaS CI/CD Architecture

- Built and deployed a containerized 3-tier SaaS application using Docker, Docker Compose, Nginx, Node.js/Express, PostgreSQL, Prisma, GitHub Actions, Docker Hub, Terraform, and Microsoft Azure. Implemented versioned Docker image releases, automated deployment to an Azure VM, environment-based configuration, health checks, and rollback support. GitHub: https://github.com/jaysofly/dockerized-SaaS-CI-CD_architecture

Routewell – Multi-Tier VNet Configuration

- Designed and configured Azure virtual network infrastructure for a multi-tier architecture, applying cloud networking and infrastructure-as-code concepts. GitHub: <https://github.com/jaysofly/routewell-multitier-vnet>

Expense Tracker

- Built a financial tracking application with a responsive frontend and production deployment. Live Demo: <https://expense-tracker-system-six.vercel.app/>

Dogs Nation – Dog Marketplace

- Built a responsive marketplace platform for browsing and discovering dogs with a modern marketplace-focused user experience. Live Demo: <https://dogs-nation.vercel.app/>

Asset Management App

- Built dashboard UI for tracking assets.

Game Hub

- Developed an interactive gaming platform UI.
