

ADEKUNLE JAMES

Software Engineer | Frontend Engineer | DevOps Engineer

React • Next.js • TypeScript • Node.js • Docker • CI/CD • Azure

Lagos, Nigeria • kunlele.kunzy@gmail.com • 09069903873 • github.com/jaysofly • linkedin.com/in/adekunle-abowaba

PROFESSIONAL SUMMARY

Software Engineer with experience building responsive web applications, backend APIs, containerized systems, and cloud deployment workflows. Strong hands-on experience with React, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Docker, GitHub Actions, Terraform, Microsoft Azure, Nginx, REST APIs, and CI/CD. Experienced in translating product requirements into maintainable software, integrating APIs, improving application performance, and automating reliable deployments. Currently building AI-assisted and data-driven platforms.

CORE TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, shadcn/ui, Chakra UI, Redux, Figma
Backend	Node.js, Express.js, Next.js API Routes, REST APIs, Repository Pattern
Data	PostgreSQL, Prisma, CognoDB, Cypher
DevOps & Cloud	Docker, Docker Compose, GitHub Actions, CI/CD, Terraform, Microsoft Azure, Azure VM, Azure Networking, Nginx, Docker Hub
Infrastructure	Virtual Networks (VNETs), Network Security Groups, Public IP, Azure Bastion, Reverse Proxy, Infrastructure as Code
AI & Tools	OpenAI API, Git, GitHub, Vercel

PROFESSIONAL EXPERIENCE

Frontend Developer — P2Vest | 2022

- Built responsive UI components, improved application performance, and collaborated with backend teams to integrate APIs.

Frontend Developer — Heirs Holdings | 2018–2020

- Developed scalable web interfaces and reusable components while enhancing UI consistency and usability.

Web Developer — Deebaak IT World | 2013–2017

- Built and maintained multiple client websites with a focus on responsiveness, usability, and performance.

SELECTED PROJECTS

VoteShield — Voter Integrity & Pattern Detection Platform

- Built a platform connecting voters, voter cards, voting attempts, polling units, and devices to identify patterns that may indicate unauthorized card usage.
- Frontend: Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, Lucide React. Backend: Next.js API Routes, TypeScript, Repository Pattern. Database: CognoDB, Cypher. DevOps: Docker, Docker Compose, GitHub Actions, Vercel. Runtime: Node.js 22.
- Live: voteshield-rho.vercel.app/

NovelVerse — Social Reading & Author Platform | Ongoing

- Building a platform where authors and readers connect, with a focus on creating, discovering, reading, and engaging with novel content.
- Backend: TypeScript, Express.js, PostgreSQL, Prisma. AI: OpenAI for AI-assisted writing. Frontend: Next.js planned.

FormFlow — Dockerized SaaS CI/CD Architecture

- Built and deployed a containerized 3-tier SaaS application using Docker, Docker Compose, Nginx, Node.js/Express, PostgreSQL, Prisma, GitHub Actions, Docker Hub, Terraform, and Microsoft Azure. Implemented versioned Docker image releases, automated deployment to an Azure VM, environment-based configuration, health checks, and rollback support.
- GitHub: github.com/jaysofly/dockerized-SaaS-CI-CD_architecture

Routewell — Multi-Tier VNet Configuration

- Designed and configured Azure virtual network infrastructure for a multi-tier architecture, applying cloud networking and infrastructure-as-code concepts.
- GitHub: github.com/jaysofly/routewell-multitier-vnet

Expense Tracker

- Built a financial tracking application with a responsive frontend and production deployment. Live Demo: expense-tracker-system-six.vercel.app/

Dogs Nation — Dog Marketplace

- Built a responsive marketplace platform for browsing and discovering dogs with a modern marketplace-focused user experience. Live Demo: dogs-nation.vercel.app/

Asset Management App

- Built dashboard UI for tracking assets.

Game Hub

- Developed an interactive gaming platform UI.

EDUCATION

Aptech Computer Education — Software Engineering

PROFESSIONAL FOCUS

Frontend development • Backend/API development • DevOps engineering • Cloud deployment • Containerization • CI/CD automation • Infrastructure as Code • Azure networking • AI-assisted application development • Production deployment
